

Shashank Patel

Software Developer · Backend Systems, Data Pipelines & Reliability

Halifax, Nova Scotia mr.shashank1999@gmail.com LinkedIn GitHub

PROFILE

Software developer with 3+ years of experience building backend services, data pipelines, and observability tools for complex, regulated workflows. Delivered reusable automation that reduced processing time by 40%, cut data latency by 60%, and improved production issue detection from hours to minutes.

EXPERIENCE

Software Developer

May 2023 – October 2026

Royal Bank of Canada (RBC) · Halifax, Nova Scotia

- Designed reusable Apache NiFi workflows for compliance reporting and cross-system reconciliation, reducing processing time by 40% and data latency by 60%; the patterns were adopted across the department.
- Built 15+ Elasticsearch and Kibana monitoring dashboards that gave operations teams real-time visibility and cut issue detection from hours to minutes.
- Created Python, Shell, and Node.js automation for ticket generation, alerting, and compliance triggers; production support teams adopted the tools for daily use.
- Traced a recurring logic defect across three production systems to its root cause and shipped a fix that eliminated the false-positive incident cycle.
- Partnered with compliance, trading operations, and treasury teams to shape requirements and deliver reliable production workflows.

Software Developer Co-op

September 2022 – December 2022

Royal Bank of Canada (RBC) · Toronto, Ontario

- Processed and reconciled 100,000+ records for internal audit using Python validation controls to identify cross-system discrepancies.

SELECTED PROJECTS

Sports Restaurant Queue Management

Built and deployed a Java 17 / Spring Boot queue-management app in a three-hour interview time-box, using AI-assisted code generation. Implemented FIFO customer queues and shortest-queue employee assignment.

AlterEcho

Built an interactive audio-processing app with device routing, voice profiles, and real-time effects. The live demo reports approximately 3 ms processing at a 128-sample audio quantum.

MyChatGPT

Built a Next.js conversational AI app using TypeScript, OpenAI APIs, custom REST endpoints, and Firebase authentication.

TECHNICAL SKILLS

Backend & APIs: Java, Spring Boot, Python, Node.js, REST APIs, SQL

Data & integration: Apache NiFi, Apache Kafka, PostgreSQL, Elasticsearch, Logstash, Kibana

Reliability & platforms: Dynatrace, MoogSoft, OpenShift / Kubernetes, Docker, GitHub Actions, UrbanCode Deploy

Web & testing: React, Next.js, TypeScript, Jest, pytest, Postman

EDUCATION

Master of Applied Computing

2021–2022

University of Windsor

PROFESSIONAL DEVELOPMENT

Elasticsearch and Kibana Basics (RBC internal training) · Cloud Monitoring with Dynatrace · Functional Programming Principles in Scala (Coursera) · Enterprise Architecture Foundations (LinkedIn Learning)
